Yugambeh Nation

Name: _____

Date: _____

AGES 11 TO 15 · MATHEMATICS AND HISTORY

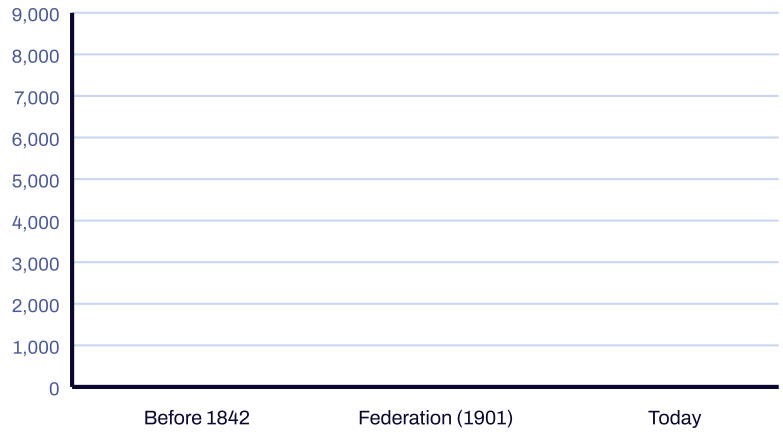

From 9,000 to 150

The Free Settlement Reading says the Yugambeh population fell from an estimated 9,000 to just ~150 by the time of Federation, and has grown back to over 5,000 today.

The data

Before 1842	**~9,000**
Federation (1901)	**~150**
Today	**5,000+**

Questions

1. By about how many people did the population fall between 1842 and Federation?

2. What percentage of the population was lost? (Hint: divide the loss by 9,000, then multiply by 100.)

3. How many times bigger is today's population (5,000) than the 150 survivors?

4. The Reading says the population was reduced by "a rapid, systematic incursion". What does your graph show about how fast the change was?
